Air force portal not working from home

How do I retrieve my password and username? Click the "Reset Your Password" on the AF Portal Login Screen at and follow the directions. If that option fails, please contact the helpdesk. You will need to login within 24 hours of requesting this temporary password, or you will need to request a new password again. Air Force Portal Splash Page Hier sollte eine Beschreibung angezeigt werden, diese Seite lässt dies jedoch nicht zu. Can't Log into Air Force Email with CAC - Fix ... If you're webmail, OWA or DesktopAnywhere isn't working with CAC, try this fix. I use this method all the time considering how difficult it is to view email ... air force login problem solved - YouTube Enjoy the videos and music you love, upload original content, and share it all with friends, family, and the world on YouTube. Accessing AFPortal from Home - AirForce - reddit I'm having trouble accessing the Air Force Portal from my home computer; I need to get some info from my e-mail, and I'm on leave at the moment. I can't even reach the portal; Internet Explorer just displays: This page can't be displayed Turn on TLS 1.0, TLS 1.1, and TLS 1.2 in Advanced settings and try connecting to ... Accessing AFPortal from Home from AirForce MilitaryCAC's U.S. Air Force CAC Resource page Information for Air Force personnel using Apple Computers: AROWS will not continue to the login page if it identifies your browser as non-compatible. This is easily fixed by having Safari report it "is" IE. Go to Safari->Preferences ->Advanced and ensure the "Show develop menu" check box is ticked. Now when you open NROWS and it gives the browser error, go to the Develop menu in the menu bar and select User Agent->Internet Explorer (any version 6.0 or greater) The "Unsupported ... AF PORTAL LOGIN - Air Force Portal Splash Page AF PORTAL LOGIN. CAC/ECA; PASSWORD; Insert your CAC / ECA to begin your login LOG IN. Membership & Support Information - View Air Force Portal Registration Requirements - Register for a new AF Portal Account w/ your CAC - Contact the Help Desk - Tablet and Smartphone Requirements - TENS - An Alternative to Access CAC-Restricted Sites; The security accreditation level of this site is ... AF Portal: Login Page What is the Air Force Portal? Why can't I use other browsers? What are the AF Portal Software Configuration Requirements? Why does it take me back to the AF Home Page after a period of inactivity? Why am I seeing a "Security Alert" dialog box when I connect to the AF Portal? Account Registration; How do I register for an AF portal account? New CAC. Keep getting "User not found" error message when ... A Major came to me with that problem a couple weeks ago with his new CAC. He had to call the portal help desk to get his portal account associated with that new certificate. level 1. 2 points · 1 year ago. I've seen something like this a couple of times, users with new CAC card problems. On Internet Explorer you have to go into Options and delete the old certs and leave the new ones. level ... New CAC. Keep getting "User not found" error message when trying to log into any website on AF Portal. What can I do to resolve this? from AirForce AFPCSecure 4.0 - Check Portal Air Force Personnel Center, Randolph AFB, Texas 78150 Last Reviewed: 31 July 2020 iStock The sweltering heat of the summer months is a good reminder of the value of an air conditioning unit. In parts of the country such as Las Vegas, Phoenix and Arizona, summer highs can reach over 100 degrees Fahrenheit. On the other side, parts of the North-East and the Midwest experience biting cold in the winter. This makes it necessary to install a robust air conditioner unit to balance out the extremes.Air conditioner units come in portable as well as fixed versions. A portable air conditioner can stand in a small space inside the house and typically runs on electricity. Fixed style air conditioners are larger and will cost more.You can get air conditioner units for the home starting from around \$250 for portable units, and \$500-\$5000 for wall mounted air conditioners.Reputable Air Conditioner BrandsBuying a brand name air conditioner gives you the peace of mind that the product will last. This is critical when buying an air conditioner since you will need its services for a long time. You want a unit that will last for years without frequent breakdowns.GE is a market-leading brand when it comes to air conditioners. It leads in the category for window-installed air conditioners. Some of its models include the GE AEC08LW, GE AEZ08LV, and GE AHM05LW. Another leading air conditioner brand to consider is LG. LG makes high-quality consumer electronics, including everything from TVs to home air conditioning units. The LG LW8016ER and LG LW6016R are some of the air conditioners available from LG. LG air conditioners will cost around \$150-\$500 for window units.Other brands like Kenmore and Frigidaire also offer great value when it comes to air conditioning. The Best Ranked Home Air ConditionerMany established brands sell quality air conditioners. Some of these include LG, GE, Amana, and others. However, another brand stands out for offering the best components and builds when it comes to air conditioning systems. That company is Goodman. Goodman is one of the best brands in the market and has been tried in some of the toughest markets around the country. Customers in heat pockets such as Arizona and Texas have come to rely on Goodman's ability to keep their homes cool during the scorching summer heat. Goodman has a solid reputation for its business practices and has also won numerous industry awards.For most homes, units like Goodman's GSXC16/DSXC16 or the even more powerful GSXC18/DSXC18 will do a thorough cooling job. The GSXC18/DSXC18 operates very efficiently, with a Seasonal Energy Efficiency Rating (SEER Rating) of 18. This indicates very efficient cooling capabilities, making it an ideal choice for the home. Best Overall Portable Air Conditioner BrandA portable air conditioner is adequate for small houses and large rooms. It costs less than a central air conditioning unit and can be relocated around the house depending on where it's needed most.Honeywell is one of the best brands to consider when shopping for a portable air conditioner. The company has highly efficient portable air conditioners such as:Honeywell MN10CESWW 10,000 BTU Portable Air Conditioner - Costs around \$400 Honeywell MM14CCS 14,000 BTU Portable Air Conditioner - Costs around \$500 These are very powerful units that will keep the house cool even on very hot days.Carrier Air ConditionersCarrier has some of the most powerful air conditioners on the market. The company's high-end models have very high SEER ratings. Running a Carrier unit means that you will save money on cooling costs over the course of the year.Carrier's high-end air conditioners are available from major suppliers at these approximate prices:Infinity 24ANB1 21 SEER - Costs around \$4,000 Infinity 24ANB7 17 SEER - Costs around \$2,600 Performance 24ACB7 17 SEER - Costs around \$2,400 Performance 24AC06 16 SEER - Costs around \$2,300 With a solid industry reputation, Carrier competes very favorably against other leading brands such as Goodman and Amana. MORE FROM LIFE123.COM The Air Force download sites below require you to login with your CAC Windows 10 users click here for information on how to use your CAC on your computer. DO NOT follow instructions below Windows 8.1 users click here for information on how to use your CAC on your computer. DO NOT follow instructions below Personnel who utilize VMware Horizon need to update their client NOTE: For Macs running Mac OS 10.15.6, once you've installed the above VMware Horizon program, you will need to make a slight adjustment. In the top bar select the program name, Preferences, Security, and select a button that states: "Do not verify identities." your CAC is a "GEMALTO TOP DL GX4 144," "GEMALTO DLGX4-A 144," "GEMALTO DLGX4 128Kv2," "Oberthur ID One 128 v5.5 Dual," "Oberthur ID One v5.5a D," "G&D FIPS 201 SCE 3.2," or "G&D FIPS 201 SCE 7.0" you "may" be able to use your CAC without needing to install ActivClient. Another guide to help figure out which CAC you have Read more about the older CACs and how to replace them Here are more options for you (if the above didn't work) INFORMATION FOR APPLE USERS ONLY ACTIVCLIENT INSTALLATION PROBLEMS AND SOLUTIONS Air Force users, download Lotus forms from: Download "AFDPO Releases Updated IBM Lotus Viewer_DSign_3.5.1.333.exe" under Software link OTHER AIR FORCE SPECIFIC PROBLEMS: Not able to digitally sign / encrypt / decrypt emails using OWA? Problem 1: Receiving "Your CA was not recognized. You should contact your CSA/LAN support team for assistance with DoD certs on this computer. You can install the latest DoD certs from..." error message when attempting to access the AF Portal Information: The Cross Cert remover tool removes certificates which cause the cross-certificate chaining issue from Microsoft Local Computer and User Certificate stores. This will prevent your certificate from appearing to be issued by roots other than DoD Root CA 2 and being denied access to DoD websites. Some computers may have the Federal Bridge Certificate Authority's DoD Root CA 2 certificate installed. This conflicts with the DoD's DoD Root CA 2. You must remove the DoD Root CA 2 signed by the DoD Intermediate Root CA 1 in order to use the AF Portal with your CAC. Cure 1-1: Follow the guidance in this PDF, slide 15 has download links for the Cross Cert remover tool. Cure 1-2: If after following guidance above you're still having problems, go from this direct link. Problem 2: Air Force users receiving "There was a problem with this browser accessing your CAC for authentication. You may have pressed "cancel" button in your browser's certificate selection prompt. If you are trying to authenticate with your CAC, please clear your SSL sessions. In IE go to the Tools-Internet options. Select the content tab and press the "Clear SSL State button." If this does not work or you are unable to complete this close all open browser windows and try again. Cure 2-1: Verify your clock settings on your computer. One person's battery had died, and his clock was set for November 2011, when it was actually August 2012. Problem 3: Air Force users seeing strange error message when using Outlook Web Access 2003 with Internet Explorer 10 or 11. Cure 3-1: See here for solution. Problem 4: Air Force users with OS X 10.9.x Mavericks and newer having problems accessing or follow same guidance as DTS users via the DTS page. Problem 5: Air Force webmail constantly getting the message The page cannot be displayed Cure 5-1: Follow this guide to find out how to add https://*.mail.us.af.mil to your trusted sites INFORMATION FOR APPLE MAC USERS ONLY NOTE: In order to access some of the Air Force CAC-enabled websites, you must CANCEL when it first asks for your PIN. After canceling, then choose your certificate, it will give you a second opportunity to enter your PIN. NOW enter your PIN. Information for Air Force personnel using Apple Computers: AROWS will not continue to the login page if it identifies your browser as non-compatible. This is easily fixed by having Safari report it "is" IE. Go to Safari->Preferences ->Advanced and ensure the "Show develop menu" check box is ticked. Now when you open NROWS and it gives the browser error, go to the Develop menu in the menu bar and select User Agent->Internet Explorer (any version 6.0 or greater) The "Unsupported" page will refresh, Now paste the URL below back into the web browser again, you should be back at the login screen. This should work from the air Force Portal, or directly at the URL: Try using User-Agent Switcher for Chrome You can try this as well for AROWS, but, you'll need Google Chrome: NROWS sets some narrow parameters when it comes to User Agent identification. Thursby software has figured this out. You'll need to build an AppleScript and use Google Chrome as your browser: The first step is to build the AppleScript. Open Utilities > AppleScript Editor. Paste the code from below. Choose File > Save As... Select File Format: Application. Give the item a name and save. Then run the app. Code: set myURL to " tell application "System Events" set processList to name of every processend tell if processList contains "Google Chrome" then beep set theReturnedItems to (display dialog "Google Chrome is already running." & return & "Would you like to quit and relaunch it?" default button "Cancel") set theButtonName to the button returned of theReturnedItems -- If user clicks "Cancel", this part of the script is never executed.end if- This gets the path to Google Chrome. Unfortunately, it also launches the app.set myGoogleChromePath to POSIX path of (path to application "Google Chrome" tell application "Google Chrome" to quitdelay 1set myCommand to "open " & quoted form of (myGoogleChromePath) set myAgent to "-args -user-agent=\"Mozilla/5.0 (X11; U; Linux x86_64; pl-PL; rv:2.0) Gecko/20110307 Firefox/4.0\"set myscript to myCommand & " " & myAgent & " " & myURLdo shell script myscript Safari keeps crashing An Air Force person emailed this fix to me: He would load his OWA, and the window would only stay open for about 10-20 seconds before OWA tried to open a calendar popup reminder. This popup would crash his Safari window, leading him to a frustrating "Safari quite unexpectedly" error message. He could access other CAC websites like Air Force Portal, DTS, Leaveweb, and ADLS. He found a workaround while searching through Thursby forum that had the idea of going to Options, Accessibility, selecting Use the blind and low vision experience. This disabled the annoying calendar popup, now his OWA window no longer crashes Safari. He mentioned the visual experience is more basic now, but at least he can access his email.
